

ENGINEERING ENGAGEMENT WITH REGIONAL INDUSTRIES

Dr. Clay Walden

Director, Center for Advanced Vehicular Systems, Mississippi State University, Starkville, MS, USA
Email: walden@cavse.msstate.edu

Presentation Summary (limited to 200 words)

The presentation will focus on experiences and lessons learned from Mississippi State University's Center for Advanced Vehicular Systems Extension, an engineering outreach center located adjacent to the Nissan Assembly plant in Canton, MS. The presentation will highlight the types of services provided and how these services impact the state's industries, as well as regional economic development. Also, consideration will be given to the use of engineering engagement as a catalyst for enhancing relationships between the university and industries.
